

The Minutes

When the hour hand moves from one number to the next (from 1 to 2, or from 6 to 7, etc.), it takes one hour to do that.

In that same one hour of time, the minute hand travels from 0 to 60 minutes.

So one hour is 60 minutes. A half-hour is 30 minutes.

When you read the minute hand, you use the green numbers. They are not normally marked on clocks. You need to know them.

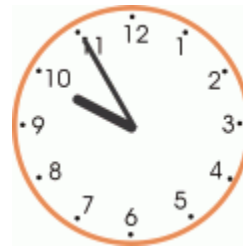

1 hour = 60 minutes.
1/2 hour = 30 minutes.

The hour hand is past 8.
The minute hand is at 15.
The time is 8:15.

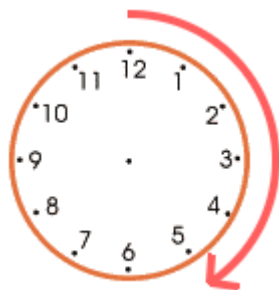

The hour hand is past 3.
The minute hand is at 25.
The time is 3:25.

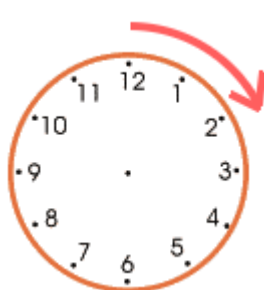

The hour hand is past 9.
It has not yet passed 10,
though it is close.
The minute hand is at 55.
The time is 9:55.

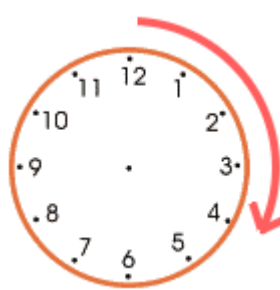

1. The arrow shows how much the minute hand travels. How many minutes of time passes?

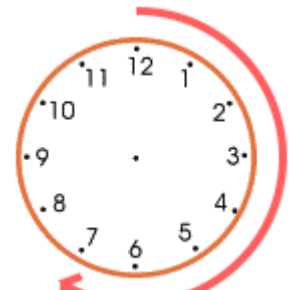

a. ___ minutes

b. ___ minutes

c. ___ minutes

d. ___ minutes
