

Using the Calendar

The calendar is divided into *weeks*. Each week has 7 days. The names of those days are written in a row, from Sunday through Saturday (or sometimes from Monday through Sunday), above the numbers.

The week from the 12th through the 18th is highlighted. It is 7 days.

What day is one week after October 20th?

It is the day directly under it on the calendar, October 27th.

You could also add 7 to the number of the day: $20 + 7 = 27$.

October 2010						
Sun	Mon	Tue	Wed	Thu	Fri	Sat
					1	2
3	4	5	6	7	8	9
10	11	12	13	14	15	16
17	18	19	20	21	22	23
24	25	26	27	28	29	30
31						

What day is one week after October 25th?

November 1st is one week after October 25th because it would be directly under the number 25 if we continued writing the days of November in the boxes.

What day is three weeks after October 25th?

You need to “jump” down three rows. First go from October 25th to November 1st on the next calendar, and then two weeks more from there. November 15th is exactly three weeks later than October 25th.

What day is six weeks after October 14th?

Go down six rows, but skip from October 28th directly to the first Thursday of November, and then on from there. It is November 25th.

What day is three weeks before November 10th?

November 3rd is one week before that. Go up one more week to October 27th, and then one more to October 20th.

What day is two months after March 10th?

Just change the name of the month: it is May 10th.
