

4. Write the corresponding mixed numbers below the decimal numbers on the number line.

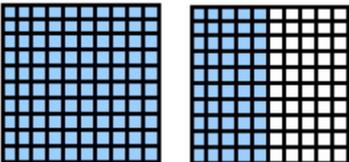

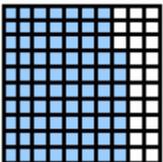

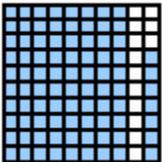

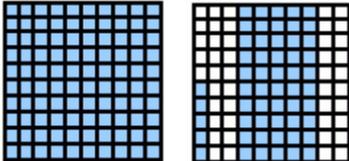

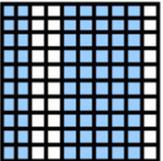

5. Write in your notebook the following decimals in order from smallest to greatest. If you find it difficult, draw first a number line from 6 to 7 as in exercise 2.

6.57 6.54 6.98 6.23 6.9 6.2 6.50 6.02 6.1 6.08 6.25 6.01

Another way of illustrating hundredths is **dividing something into hundred parts**.

	<p>This whole square represents one (1) whole. It is divided into hundred parts, so each part is _____.</p>		<p>This is twenty hundredths = 0.20 But it is also two tenths = 0.2, since each of the 10 columns is one tenth of the 1 whole.</p>
	<p>This represents 32 hundredths = 0.32</p>		 <p>This is 1 whole five hundredths = 1.05</p>

6. What numbers are the pictures illustrating? Write as a fraction and as a decimal both.

<p>a.</p> 	<p>b.</p> 	<p>c.</p> 
<p>d.</p> 	<p>e.</p> 	<p>f.</p>
