

Part of a Whole Group 1

Four of the ten parts are colored.

$\frac{4}{10}$ of the parts are colored.

Three of the nine apples are dark.

$\frac{3}{9}$ of the apples are dark.

1. In each group are two different kinds of things. Write each part as fractions of the whole group.

<p>a.</p> <p>$\frac{4}{7}$ of the objects are carrots. $\frac{3}{7}$ of them are apples.</p>	<p>b.</p> <p>$\frac{4}{9}$ of the objects are stars. $\frac{5}{9}$ of them are hearts.</p>
<p>c.</p> <p>$\frac{5}{6}$ of the shapes are rectangles. $\frac{1}{6}$ of them are parallelograms.</p>	<p>d.</p> <p>$\frac{3}{8}$ of the trees are dark. $\frac{5}{8}$ of them are not dark.</p>

2. Fill in using fractions. (Hint: you need to think how many are in the whole group.)

<p>a. There are 5 girls and 6 boys.</p> <p><input type="text"/> of all the students are boys.</p> <p><input type="text"/> of all the students are girls.</p>	<p>b. There are 4 apples, 5 bananas, and 3 mangoes</p> <p><input type="text"/> of all the fruit are apples.</p> <p><input type="text"/> of all the fruit are mangoes.</p>
---	--

3. An egg carton contains a dozen eggs.
Write what fraction of the carton of eggs is

6 eggs	4 eggs	8 eggs	3 eggs	2 eggs	10 eggs
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

4. Write as a fraction what part of the day is...

- a.** 12 hours **b.** 6 hours **c.** 3 hours **d.** 9 hours **e.** 16 hours
