

Mixed Numbers 1

<p>Mixed numbers have two parts: a part that tells you the whole numbers, and a fractional part.</p>	 $1 \frac{1}{3}$ "One and one-third"	 $2 \frac{3}{4}$ "Two and three-fourths"
--	--	--

1. Write what mixed numbers the pictures illustrate.

 <p>a.</p>	 <p>b.</p>	 <p>c.</p>
 <p>d.</p>	 <p>e.</p>	 <p>f.</p>
 <p>g.</p>	 <p>h.</p>	 <p>i.</p>

2. Draw pictures to illustrate these mixed numbers.

<p>a. $1 \frac{1}{2}$</p>	<p>b. $2 \frac{2}{3}$</p>	<p>c. $2 \frac{3}{5}$</p>
<p>d. $1 \frac{5}{6}$</p>	<p>e. $3 \frac{1}{3} =$</p>	<p>f. $3 \frac{5}{8}$</p>

You can count all the same kind of fractional parts from a mixed number, and then write the mixed number as a fraction.

$1 \frac{1}{3}$

If I count all the thirds,

I get four thirds: $\frac{4}{3}$

$2 \frac{3}{4}$

If I count all the fourths,

I get eleven fourths: $\frac{11}{4}$

3. Find the matching pairs.

$1 \frac{3}{4}$

$\frac{9}{4}$

$2 \frac{1}{4}$

$\frac{9}{8}$

$1 \frac{1}{8}$

$\frac{12}{5}$

$3 \frac{1}{5}$

$\frac{11}{8}$

$1 \frac{3}{8}$

$\frac{7}{4}$

$2 \frac{2}{5}$

$\frac{16}{5}$

4. Fill in the blanks.

One whole is three thirds.
