

3. Draw symmetry lines into these figures.

4. Draw symmetry lines to those capital letters that have line symmetry.

5. At home, peek into the food cabinet and fridge and find some logos of companies on the food products. Check also car brand names logos, or store logos when shopping. You can also look for logos in magazines and in the internet with parental supervision. When examining each logo, think on these questions:

a) Does the logo employ a polygon, a circle, an ellipse, or other basic geometric figure in some way?

b) Does it have any symmetry?

Choose at least 3 interesting/well made logos, and sketch them below. Explain your answers to a) and b) concerning those logos.

6. Draw a mirror image in the mirror line to get a symmetrical figure.
