# Divide Polygons

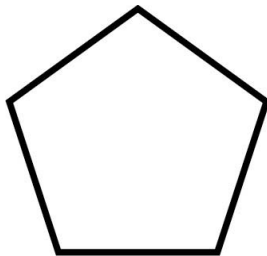

1. Draw line segments into the shape and divide it into other shapes!

 <b>a.</b> to a square and a rectangle	 <b>b.</b> to a triangle and a pentagon	 <b>c.</b> to three rectangles
 <b>d.</b> to two quadrilaterals that are not rectangles	 <b>e.</b> to two parts that are exactly the same shape	 <b>f.</b> to four triangles
 <b>g.</b> to four triangles	 <b>h.</b> to a triangle and a pentagon	 <b>i.</b> to four parallelograms

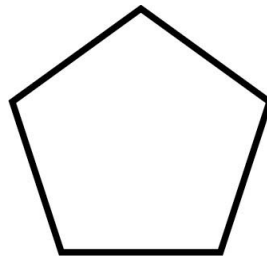

2. Divide the pentagon and hexagon in different shape parts using line segments. Write what kind of parts you got.
