# Missing Addend and Subtraction 1

1. Write the numbers and x to the pictures. Write a missing addend sentence, and a subtraction sentence to solve it.

a. The school has 547 students, of which 265 are girls. How many are boys?

b. Of the 148 kennel dogs, 86 are not dotted and the rest are dotted. How many are dotted?

2. Write a missing addend sentence with x. Solve.

a. The store has 450 small lamps and total of 980 lamps. How many of the lamps are big?

$$\begin{array}{l} \text{small} + \text{big} = \text{total} \\ \underline{\quad} + \underline{\quad} = \underline{\quad} \end{array}$$

x =

b. A school's teachers and students filled a 450-place auditorium. If the school had 43 teachers, how many students did it have?

$$\begin{array}{l} \text{students} + \text{teachers} = \text{total} \\ \underline{\quad} + \underline{\quad} = \underline{\quad} \end{array}$$

x =

c. Mom had \$250 and she came back with \$78. How much did she spend?

$$\begin{array}{l} \text{spent} + \text{left} = \text{had orig.} \\ \underline{\quad} + \underline{\quad} = \underline{\quad} \end{array}$$

x =

d. Janet had \$200. She bought an item for \$54 and another for \$78. How much is left?

$$\begin{array}{l} \text{item 1} + \text{item 2} + \text{left} = \text{total} \\ \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad} \end{array}$$

x =

e. Jean bought one thing for \$23 and another for \$29, and he had left \$125. How much did he have originally?

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

x =
