

# Subtract in Columns

## Review regrouping with zeros.

You cannot regroup a ten nor a hundred. So regroup 1 thousand as 10 hundreds.

$$\begin{array}{r} 6 \text{ } 10 \\ 7 \text{ } 0 \text{ } 0 \text{ } 2 \\ - 4 \text{ } 9 \text{ } 3 \text{ } 3 \\ \hline \end{array}$$

Next, regroup one of the hundreds as 10 tens.

$$\begin{array}{r} 9 \\ 6 \text{ } 10 \text{ } 10 \\ 7 \text{ } 0 \text{ } 0 \text{ } 2 \\ - 4 \text{ } 9 \text{ } 3 \text{ } 3 \\ \hline \end{array}$$

Lastly, regroup one of the tens as 10 ones (there are already 2 ones so you get 12).

$$\begin{array}{r} 9 \text{ } 9 \\ 6 \text{ } 10 \text{ } 10 \text{ } 12 \\ 7 \text{ } 0 \text{ } 0 \text{ } 2 \\ - 4 \text{ } 9 \text{ } 3 \text{ } 3 \\ \hline 2 \text{ } 0 \text{ } 6 \text{ } 9 \end{array}$$

1. Subtract in columns. Check by adding!
