Introduction

Math Mammoth Numbers & Operations Worksheets Collection contains worksheets related to all four operations from Math Mammoth Grade 3, Grade 4, Grade 5, and Grade 6 worksheets collections, here in one handy package for those who would need them.

The grade-level worksheets packages were originally created for and in collaboration with SpiderSmart, Inc. tutoring company.

The Numbers & Operations worksheets collection is most useful for teachers and tutors who teach students on various grade levels, or who need such a wide-spanning collection for review or reteaching purposes.

The collection starts out with place-value related sheets. Those cover mainly place value as related to large numbers, and do not include place value as studied in the first two grades (tens, ones, hundreds, thousands).

Then the collection has lots of worksheets dealing with all four operations: mental math, order of operations, addition/subtraction connection, multiplication/division connection including simple equations, properties of operations including the distributive property.

Lastly, there are worksheets with word problems and some for review.

I hope the problems will fit your needs.

I wish you success with math teaching!
