

Missing Addend Problems and Fact Families

Nathalie needs ten safety-pins. She only has two.
How many more does she need?

$$2 + \square = 10$$

You can solve $2 + \underline{\quad} = 10$ with subtraction:

$$2 + \underline{\quad} = 10 \qquad 10 - 2 = \underline{\quad}$$

The answer to both problems is 8!

Use the Fact Family:

$$2 + 8 = 10, \quad 10 - 2 = 8$$

$$8 + 2 = 10, \quad 10 - 8 = 2$$

1. Fill in. Note you can use the facts from the same fact family in each case.

<p>a.  + ?</p> $5 + \underline{\quad} = 7$ $7 - 5 = \underline{\quad}$	<p>b.  + ?</p> $3 + \underline{\quad} = 8$ $8 - 3 = \underline{\quad}$	<p>c.  + ?</p> $4 + \underline{\quad} = 9$ $9 - 4 = \underline{\quad}$
<p>d.  + ?</p> $5 + \underline{\quad} = 10$ $10 - 5 = \underline{\quad}$	<p>e.  + ?</p> $4 + \underline{\quad} = 7$ $7 - 4 = \underline{\quad}$	<p>f.  + ?</p> $5 + \underline{\quad} = 8$ $8 - 5 = \underline{\quad}$
<p>g.  + ?</p> $3 + \underline{\quad} = 10$ $10 - 3 = \underline{\quad}$	<p>h.  + ?</p> $2 + \underline{\quad} = 9$ $9 - 2 = \underline{\quad}$	<p>i.  + ?</p> $1 + \underline{\quad} = 7$ $7 - 1 = \underline{\quad}$
