

Review: Completing the Next Whole Ten

1. Write the previous and next **whole ten**. Then, circle the ten that is nearer the given number.

a. _____, 56, _____	b. _____, 72, _____	c. _____, 94, _____
d. _____, 37, _____	e. _____, 25, _____	f. _____, 31, _____

52 and how many more makes the next ten (60)? We can write $52 + \underline{\quad} = 60$.
 You can solve it using a *helping* problem: 2 and how many more makes ten?
 The answer to both problems is the same. It is 8.

2. Complete the next ten. Below, write a helping problem using numbers within 0-10.

a. $17 + \underline{\quad} = 20$ $7 + \underline{\quad} = 10$	b. $62 + \underline{\quad} = \underline{\quad}$ $2 + \underline{\quad} = \underline{\quad}$	c. $94 + \underline{\quad} = \underline{\quad}$ $4 + \underline{\quad} = \underline{\quad}$
--	--	--

3. Complete the next ten. Think of the helping problem that uses numbers within 0-10.

a. $42 + \underline{\quad} = 50$	b. $34 + \underline{\quad} = \underline{\quad}$	c. $66 + \underline{\quad} = \underline{\quad}$
d. $61 + \underline{\quad} = \underline{\quad}$	e. $97 + \underline{\quad} = \underline{\quad}$	f. $83 + \underline{\quad} = \underline{\quad}$

4. Circle the even numbers. 8 9 12 15 10 19 11 6 17

5. Now pick the even numbers from the previous exercise, and write each of them as a double of some number.

a. _____ = _____ + _____	b. _____ = _____ + _____
c. _____ = _____ + _____	d. _____ = _____ + _____
