Measuring Length: Metric

1. Draw lines.
   - a. 2 cm
   - b. 10 cm
   - c. 4 cm
   - d. 7 cm
   - e. 18 cm

2. Measure the lines to the nearest centimeter.
   - a. __________
   - b. _______
   - c. __________________________
   - d. __________________________
   - e. __________________________

3. Use a ruler, a measuring tape, and measure:
   a. Small items (using centimeters):
   b. Longer items (using meters and centimeters):

<table>
<thead>
<tr>
<th>Item</th>
<th>Length (cm)</th>
<th>Item</th>
<th>Length (m cm)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

4. Which is the best estimate?
   a. side of a room: 30 cm, 3 m, 3 cm
   b. distance between two towns: 100 cm, 100 km, 100 m
   c. width of a store parking lot: 30 cm, 30 km, 30 m
   d. height of a window: 1 m, 1 cm, 10 cm
   e. height of an adult: 1 m, 1 m 70 cm, 10 cm
