

More from *math* **MAMMOTH**

Math Mammoth has a variety of resources to fit your needs. All are available as economical downloads, and most are also available as printed copies.

- **Math Mammoth Light Blue Series**

A complete curriculum for grades 1-7. Each grade level includes two student worktexts (A and B), which contain all the instruction and exercises all in the same book, answer keys, tests, cumulative reviews, and a worksheet maker. South African version is also available.

- **Math Mammoth Blue Series**

Blue Series books are topical worktexts for grades 1-7, containing both instruction and exercises. This series covers all of elementary school mathematics from 1st grade addition to 7th grade equations. The topics include for example addition, subtraction, clock, measuring, money, multiplication, division, fractions, decimals, ratios, proportions, geometry, equations, and many more. The Blue Series books are not tied to grade levels and are great for review, reinforcement, filling in gaps, or initial teaching.

- **Math Mammoth Golden Series**

Best suited for teachers and tutors or parents who can explain math, Golden Series books are worksheet collections for grades 3-8. They work best as review or supplemental material.

- **Make It Real Learning**

These activity workbooks concentrate on answering the question, "Where is math used in real life?" The exercises or activities in these books are taken from real life, and use real data. The series includes various workbooks for grades 3-12.

- **Review Workbooks**

Workbooks for grades 1-7 that provide a comprehensive review of one grade level of math—for example, for review during school break or summer vacation.
