
Math Mammoth End of the Year Test - Grade 2 South African Version

This test is quite long, so I do not recommend having your child/student do it in one sitting. Break it into parts and administer them either on consecutive days, or perhaps on morning/evening/morning. Use your judgment.

This is to be used as a diagnostic test. Thus, you may even skip those areas and concepts that you already know for sure your student has mastered.

The test checks for all major concepts covered in *Math Mammoth Grade 2*. This test is evaluating the student's ability in the following content areas:

- basic addition and subtraction facts within 0-18
- three-digit numbers and place value
- regrouping in addition with two- and three-digit numbers
- regrouping in subtraction with two- and three-digit numbers, excluding regrouping two times
- mental addition and subtraction
- basic word problems
- measuring and drawing with a ruler, to the nearest centimetre
- names and usage of units for measuring length and weight
- names of basic shapes
- the concept of a fraction
- reading the clock to the nearest five minutes
- counting coins and banknotes
- the concept of multiplication

Note: Problems 1 and 2 are done orally and timed. Let the student see the problems. Read each problem aloud, and wait a maximum of 5 seconds for an answer. Mark the problem as right or wrong according to the student's (oral) answer. Mark it wrong if there is no answer. Then you can move on to the next problem.

You do not have to mention to the student that the problems are timed or that he/she will have 5 seconds per answer, because the idea here is not to create extra pressure by the fact it is timed, but simply to check if the student has the facts memorised (quick recall). You can say for example (vary as needed):

"I will ask you some addition and subtraction questions. Try to answer them as quickly as possible. In each question, I will only wait a little bit for you to answer, and if you do not say anything, I will move on to the next problem. So just try your best to answer the questions as quickly as you can."

In order to continue with the Math Mammoth Grade 3 Complete Worktext, I recommend that the student gain a score of 80% on this test, and that the teacher or parent revise with him any content areas in which he is weak. Students scoring between 70% and 80% may also continue with grade 3, depending on the types of errors (careless errors or not remembering something, versus lack of understanding). The most important content areas to master are things related to addition and subtraction (including the word problems), and place value. Again, use your judgment.

Basic Addition and Subtraction Facts

In problems 1 and 2, your teacher will read you the addition and subtraction questions. Try to answer them as quickly as possible. In each question, he/she will only wait a little while for you to answer, and if you do not say anything, your teacher will move on to the next problem. So just try your best to answer the questions as quickly as you can.

1. Add.

| a. | b. | c. | d. |
|-----------------------------|-----------------------------|-----------------------------|-----------------------------|
| $6 + 7 = \underline{\quad}$ | $7 + 4 = \underline{\quad}$ | $8 + 8 = \underline{\quad}$ | $9 + 5 = \underline{\quad}$ |
| $9 + 9 = \underline{\quad}$ | $5 + 8 = \underline{\quad}$ | $6 + 6 = \underline{\quad}$ | $7 + 7 = \underline{\quad}$ |
| $5 + 6 = \underline{\quad}$ | $3 + 9 = \underline{\quad}$ | $2 + 9 = \underline{\quad}$ | $8 + 6 = \underline{\quad}$ |
| $8 + 7 = \underline{\quad}$ | $5 + 7 = \underline{\quad}$ | $4 + 8 = \underline{\quad}$ | $8 + 9 = \underline{\quad}$ |

2. Subtract.

| a. | b. | c. | d. |
